'CHAPTER 1 Equations and Inequalities Cengage

December 8th, 2019 - using the properties and rules of algebra into an equivalent form For example to solve Exercise 49 we would rewrite  $xx^2 + 25x + 322$  as  $(xx + 445)(xx + 69)$  Next we might combine terms on the left so we would have equivalent equation  $xx^2 + x^2 + 22x + 49 + 69$  We would continue the solution process to the equation  $20x$  and finally  $0x + 61$ ' 'Intermediate Algebra Alternate Version Ssm by Margaret L Lial
