'Building Area Measurement FAQs

May 11th, 2018 - Should the lease include a tolerance in area measurement and what should it be Because it is practically impossible for two qualified parties to measure the same space and come up with the exact same measurement even using the same standard a tolerance is an important feature to avoid expensive arguments over relatively small differences'

Dimension Wikipedia

May 10th, 2018 - In mathematics In mathematics the dimension of an object is an intrinsic property independent of the space in which the object is embedded For example a point on the unit circle in the plane can be specified by two Cartesian coordinates but a single polar coordinate the angle would be sufficient so the circle is 1 dimensional even'

'Part II United States Access Board

May 9th, 2018 - Suggested best practices for architects and other design professionals As the construction industry works to develop standards for construction tolerances related to specific materials and applications for accessible surfaces design professionals must also work to minimize problems caused by tolerance issues"
