## **Function Block**

July 8th, 2018 -

Getting Started with the Logix5000 PIDE Function Block The PIDE Enhanced PID is an Allen Bradley Logix5000 family ControlLogix CompactLogix FlexLogix SoftLogix function block that improves on the standard PID found in all their controllers. First impressions of this function block are quite intimidating. If you try to dive into it head first you may just end up banging your head.

### **'Quick Start Guide to Using the PID Block in Logix 500**

July 11th, 2018 - See PID Example 2 in our Free Downloads section 16. A quick word or two on the RG bit. The RG bit affects only two parameters: Gain Kc and

---

Reset Ti and is normally off or ?0? This has importance only when you want to be able to change Gain and Reset values through the data table instead of directly in the PID block using Logix 500 such as when you might want to be able to access'
