Conversion between field strength and received power
*April 25th, 2018 - Some theory
The power provided by the transmitter is radiated by the antenna As the waves leave the antenna they spread on the surface of spheres of increasing radius as they travel away'*

'Antenna radio Wikipedia
April 28th, 2018 - In radio an antenna is the interface between radio waves propagating through space and electric currents moving in metal conductors used with a transmitter or receiver In transmission a radio transmitter supplies an electric current to the antenna s terminals and the antenna radiates the energy from the current as electromagnetic waves'
