burnside ring

June 5th, 2020 - in mathematics the burnside ring of a finite group is an algebraic construction that encodes the different ways the group can act on finite sets the ideas were introduced by william burnside at the end of the nineteenth century the algebraic ring structure is a more recent development due to solomon 1967'

'heisenberg group

May 11th, 2020 - in mathematics the heisenberg group named after werner heisenberg is the group of 3×3 upper triangular matrices of the form under the operation of matrix multiplication elements a , b and c can be taken from any mutative ring with identity often taken to be the ring of real numbers resulting in the continuous heisenberg group or the ring of integers resulting in the discrete'
